The possession or use of any communications device is strictly prohibited when taking this examination. If you have or use any communications device, no matter how briefly, your examination will be invalidated and no score will be calculated for you.

Print your name and the name of your school on the lines above.

A separate answer sheet for Part I has been provided to you. Follow the instructions from the proctor for completing the student information on your answer sheet.

This examination has four parts, with a total of 39 questions. You must answer all questions in this examination. Record your answers to the Part I multiple-choice questions on the separate answer sheet. Write your answers to the questions in Parts II, III, and IV directly in this booklet. All work should be written in pen, except graphs and drawings, which should be done in pencil. Clearly indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc. The formulas that you may need to answer some questions in this examination are found at the end of the examination. This sheet is perforated so you may remove it from this booklet.

Scrap paper is not permitted for any part of this examination, but you may use the blank spaces in this booklet as scrap paper. A perforated sheet of scrap graph paper is provided at the end of this booklet for any question for which graphing may be helpful but is not required. You may remove this sheet from this booklet. Any work done on this sheet of scrap graph paper will not be scored.

When you have completed the examination, you must sign the statement printed at the end of the answer sheet, indicating that you had no unlawful knowledge of the questions or answers prior to the examination and that you have neither given nor received assistance in answering any of the questions during the examination. Your answer sheet cannot be accepted if you fail to sign this declaration.

Notice...
A graphing calculator and a straightedge (ruler) must be available for you to use while taking this examination.

DO NOT OPEN THIS EXAMINATION BOOKLET UNTIL THE SIGNAL IS GIVEN.

34 Ryan bought three bags of mixed tulip bulbs at a local garden store. The first bag contained 7 yellow bulbs, 8 red bulbs, and 5 white bulbs. The second bag contained 3 yellow bulbs, 11 red bulbs, and 6 white bulbs. The third bag contained 13 yellow bulbs, 2 red bulbs, and 5 white bulbs. Ryan combined the contents of these three bags into a single container. He randomly selected one bulb, planted it, and then randomly selected another and planted that one. Determine if it is more likely that Ryan planted a red bulb and then another red bulb, or planted a yellow bulb and then a white bulb. Justify your answer.

A particular jewelry box is in the shape of a rectangular prism. The box is advertised as having an interior length of 20.3 centimeters, an interior width of 12.7 centimeters, and an interior height of 10.2 centimeters. However, when a customer measures the interior of the box, she finds that the interior height is actually 6.3 centimeters. Upon further examination, she discovers that the bottom of the interior of the box lifts up to reveal a hidden compartment. Find the volume of this hidden compartment to the nearest cubic centimeter.

Note: Assume that the top of the hidden compartment has zero thickness.

\[ V = \ell \times w \times h \]
\[ V = (20.3)(12.7)(10.2 - 6.3) \]
\[ V = (20.3)(12.7)(3.9) \]
\[ V = 1005.459 \]

nearest cubic centimeter

\[ V = 1005 \]

36 Solve algebraically for all values of x that satisfy the equation: \( \frac{x}{x+4} = \frac{3}{x+2} \)

1. Cross multiply: \( \frac{x}{x+4} = \frac{3}{x+2} \)
2. Use Distributive Property: \( x(x+2) = 3(x+4) \)
3. Gather terms in left expression: \( x^2 + 2x = 3x + 12 \)
4. Simplify: \( x^2 + 2x - 3x - 12 = 0 \)
5. Factor: \( x^2 - x - 12 = 0 \)
6. Multiplication property of zero: \( x - 4 = 0 \) \( x + 3 = 0 \)
7. Answers: \( x = 4 \) \( x = -3 \)

Check \( x = 4 \) \( \frac{4}{4+4} = \frac{3}{4+2} \)
\( \frac{4}{8} = \frac{3}{6} \)
\( \frac{1}{2} = \frac{1}{2} \) \( \sqrt{\} \)

\( x = -3 \) \( \frac{-3}{-3+4} = \frac{3}{-3+2} \)
\( \frac{-3}{-1} = \frac{3}{-1} \)
\( -3 = -3 \) \( \sqrt{\} \)
